

**2006 All-America Selections Flower Display Garden  
Burlington, Vermont  
Waterfront Park**

he [All-America Selections](#) (AAS) is a national program to select the best of the new varieties each year. This is done in about 30 trial gardens throughout North America. Although mainly annuals, perennials can be included if they are grown from seed and bloom the first year. The varieties proving new or better than similar existing ones are given the "All America Award", and are displayed in over 200 display gardens, such as this one. The flowers below (green labels) represent some of the most recent winners and other new introductions, and are primarily annuals. Perennials on display, not part of this program (black labels), can be found on a separate list.

We are especially pleased and thankful this year for many new "specialty annuals" (those generally grown from cuttings and not seeds) provided by two wholesale greenhouse propagators in New Hampshire—Pleasant View Gardens (PVG) and DS Cole Growers (DSC). Those from PVG marked "new" are just that, new introductions to the trade this year. The PVG annuals are from their Proven Winners and Proven Selections series. Those from DSC are from several other brand name series.

Rated 8/25: 1=no flowers, 2=some flowers, 3=excellent flowering with best \* indicated.
